

Important Information about Your Drinking Water

Availability of Monitoring Data for Unregulated Contaminants for the Marshfield Water Supply

As required by US Environmental Protection Agency (EPA), our water system has sampled for a series of unregulated contaminants. Unregulated contaminants are those that don't yet have a drinking water standard set by EPA. The purpose of monitoring for these contaminants is to help EPA decide whether the contaminants should have a public health protection standard.

2015 Unregulated Contaminant Test Results:

# OF SAMPLES	NAME	RANGE OF DETECTION
