Plymouth County Mosquito Control Project accepts requests for adult mosquito spraying from residents. Residents can call up to eight times per season to have their yard sprayed. The spray used will kill the mosquitoes in the area at the time of spraying, spraying is not a preventative. Residents can call, fax or email.

Pesticide applications are made via ultra-low volume sprayer that is on the back of a pick-up truck. Weather permitting; the sprayers are operating 2 a.m. to sunrise each weekday.
