

## **INSPECTION SCHEDULE FOR NEW CONSTRUCTION, ADDITIONS, & ALTERATIONS**

**The receipt of a building permit is not the end of the permit process, but rather the beginning.** The building permit holder is responsible for arranging the required inspections before proceeding with additional work. Failure to do so may result in having to expose concealed work through partial or complete removal of some building elements, causing you delay and unnecessary expense.

It is important that you arrange for the following inspections\* by either calling 781-834-5555, or make a personal request at our office, at least 24 hours in advance.

### **Foundation with no reinforcement**

- Before backfill and after damp proofing

### **Foundation with reinforcement**

- Inspection of UFA Ground if required
- Footings with forms and rebar in place before concrete is poured
- Walls with forms and rebar in place before concrete is poured
