### NOTICE OF FILING, PUBLIC HEARING, PROCEDURAL CONFERENCE, AND REQUEST FOR COMMENTS

D.P.U. 21-76

July 16, 2021

Petition of NSTAR Electric Company d/b/a Eversource Energy for Approval of Deferral of Major Storm Threshold Amounts for 2020 Storms.

On June 25, 2021, NSTAR Electric Company d/b/a Eversource Energy (“Company”) filed with the Department of Public Utilities (“Department”) a petition for approval to defer to the Company’s storm fund the major storm threshold amount associated with six calendar year 2020 storm events, or \$7.2 million, for consideration in a future storm cost recovery proceeding. The Department docketed this matter as D.P.U. 21-76.

In the Company’s last base distribution rate case, the Department established the mechanics of the Company’s storm fund. A storm fund-eligible event must meet a \$1.2 million incremental operation and maintenance (O&M”) cost threshold and any costs that fall below \$1.2 million are not eligible for recovery through the storm fund. NSTAR Electric Company and Western Massachusetts Electric Company, D.P.U. 17-05, at 548-549 (2017). Any single storm event with incremental O&M costs that exceeds \$30 million is excluded from recovery through the storm fund. D.P.U. 17-05, at 554. Additionally, the Company collects \$3.6 million annually through base distribution rates to recover a representative level of incremental O&M storm costs (based on a representative level of three storm fund eligible events per year and applying the \$1.2 million cost-per-storm threshold). D.P.U. 17-05, at 550.

In its petition, the Company states that it experienced ten major storm events in 2020 and incurred an estimated \$66.3 million in total storm response costs, inclusive of \$12 million in storm threshold amounts. According to the Company, the number of 2020 storm fund-eligible events was extraordinary and exceed the representative level of three storm events recovered in base rates. The Company further states that each of the ten storm events exceed the \$1.2 million cost-per-storm threshold. The Company requests deferral to the storm fund of the storm thresholds associated with six storm events, or \$7.2 million. The Company states that it is not requesting deferral of the seven storm fund-eligible thresholds not included in base distribution rates because the number of storm fund-eligible events is intended to be representative and expected to vary.

The Company contends that the \$7.2 million for the six storm fund thresholds exceed the significance threshold for the Company's exogenous event provision and that the loss of \$7.2 million in incremental major storm response costs is harmful to the Company's ability to manage its operating costs. The Company asserts that it is precluded until January 1, 2023 under its performance based ratemaking plan from filing a base rate proceeding to adjust for the disparity.

The Department formulated its current standard for reviewing requests for deferral accounting treatment in North Attleboro Gas Company, D.P.U. 93-229 (1994). If certain conditions are met, the Department has previously allowed a company to defer accounting treatment of expenses incurred prior to a test year and considered the subsequent ratemaking treatment of those expenses in the company's next base distribution rate case. D.P.U. 93-229, at 7-8. Granting a deferral would not constitute a finding that the subject expenses are reasonable or that they can be recovered from ratepayers. D.P.U. 93-229, at 4.
