TOWN OF MARSHFIELD, MASSACHUSETTS

COMPREHENSIVE ANNUAL FINANCIAL REPORT

For the Year Ended June 30, 2016

Prepared by:

**The Fiscal Team
Town of Marshfield, Massachusetts**

On February 8-9, 2013, the Blizzard of 2013 known as Storm Nemo severely impacted the Town of Marshfield. The blizzard caused flooding, prolonged power outages and significant tree damage. The storm also caused damage to infrastructure including compromising one of the Town's jetties and causing a build-up of silt in the channel to the Atlantic Ocean known as the Narrows.

Town of Marshfield

Board of Selectmen
870 Moraine Street
Marshfield, Massachusetts 02050
Tel: 781-834-5563 Fax: 781-834-5527

Letter of Transmittal

February 27, 2017

To the Honorable Board of Selectmen and the Citizens of the Town of Marshfield:

State law requires the Town of Marshfield to publish at the close of each year a complete set of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) that are audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue this Comprehensive Annual Financial Report (CAFR) of the Town of Marshfield, Massachusetts, for the year ending June 30, 2016 for your review.

This report consists of management's representations concerning the finances of the Town. Consequently, management assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making these representations, management of the Town has established a comprehensive internal control framework that is designed to both protect the Town's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the Town's financial statements in conformity with GAAP. As management, we assert that this financial report is complete and reliable in all material respects.

The CAFR is designed to be used by the elected and appointed officials of Marshfield in addition to those entities concerned with the Town's management and development including credit rating agencies, bond analysts, investors and financial institutions. The format of the report enables the Town to present complex financial data in a manner that is easier for citizens and taxpayers of the Town of Marshfield to review and understand.

The Town of Marshfield's financial statements have been audited by Powers & Sullivan, LLC a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Town of Marshfield for the year ended June 30, 2016 are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion on the Town of Marshfield's financial statements for the year ended June 30, 2016 and that they are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

The independent audit of the financial statements of the Town of Marshfield was part of a broader, federally mandated "Single Audit" designed to meet the special needs of Federal grantor agencies. The standards

governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements, with special emphasis on internal controls and legal requirements involving the administration of Federal awards. These reports are available in the Town of Marshfield's separately issued Single Audit Report.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The Town of Marshfield's MD&A can be found immediately following the report of the independent auditors.

Profile of Town

The Town of Marshfield was incorporated in 1640 and occupies a land area of approximately 28.35 square miles; noted by the local population as a "community of villages." It is governed by an open Town Meeting form of government and the Chief Executive Officer is the Board of Selectmen. Marshfield is located in southeastern Massachusetts in Plymouth County and has been recognized as one of the 14 safest communities in the United States. The Town of Marshfield is bordered by the Atlantic Ocean on the east, Duxbury on the south and southeast, Pembroke and Norwell on the west, and Scituate on the north. Marshfield is a coastal town located in east central Plymouth County approximately 32 miles south of Boston, 18 miles east of Brockton, 48 miles northeast of Providence, RI, and 225 miles north of New York City. State routes 3, 3A and 139 are the principal highways and roads serving the Town. Chartered flights throughout New England are available at the Marshfield Municipal Airport. The commuter rail is also in close proximity to Marshfield, giving residents ready access into the City of Boston and other adjacent communities. The Greater Attleborough Taunton Regional Transit Authority (GATRA) provides local bus service from Plymouth to Scituate, including services for persons with disabilities.

Local legislative decisions are made by an open Town Meeting, the purest form of democracy consisting of all of the registered voters in the Town. Subject to the legislative decisions made by the Town Meeting, the affairs of the Town are generally administered by a three-member Board of Selectmen, as well as five other elected Boards. According to the U.S. Department of Commerce, Bureau of Census conducted in 2010, the Town's population was 25,531. However, unofficially the Town's summer population increases (estimated) to over 40,000.

Local school affairs are administered by a five-member School Committee through the School Superintendent. Local taxes are assessed by a three-member elected Board of Assessors; all elected for staggered three-year terms on an at large basis. A three-member Board of Public Works, similarly elected, oversees the Town's principally self-supporting Sewer, Water, and Solid Waste enterprise funds in addition to the Highway and Cemetery Departments.

The Town of Marshfield provides general governmental services for the territory within its boundaries, including police and fire protection, public education in grades kindergarten through twelve, typical municipal financial services, water and sewer services, solid waste disposal, a library, streets, parks, services to senior citizens and Veterans, and recreational activities.

The Town of Marshfield's commitment to open space, historical preservation and community housing is evidenced by its acceptance of the Community Preservation Act beginning in year 2002 at the maximum 3% surcharge. These funds have been authorized by Town Meeting for the purchase of over 350 acres of open space preserving and protecting aquifers, habitats, woodlands, marshland and meadows.

Factors Affecting Economic Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the Town operates.

The Board of Selectmen has decided that the foundation of Marshfield's government, the Town Charter needed to be modernized. The Charter was adopted in 1975 with only very minimal changes. The Board appointed a Charter Review Committee to examine the Town's governance. It would be likely that one outcome for the Town would be to have a Finance Director built into the Charter. Marshfield had one bond rating increase in the last few years and becoming a AAA bond rated community is not an unrealistic goal for the Town. The Charter would also address all needs of the Town's governance. Improving the Town's organizational structure will create an effective and efficient organization.

The Town continues to manage its financial affairs in a prudent manner. Standard & Poor's confirmed the Town's bond rating to AA+ with a stable outlook which is reflective of management's incorporation of long range planning tools such as a five year Capital Improvement Program; maintenance of reserve balances despite tight budget; investing in technology to ensure efficient operations; and maintaining an aggressive debt management strategy for capital improvements and pursuing pay-as-you-go options whenever possible. The Town consistently seeks grant opportunities for operational services as well as capital improvements.

The Town faced fiscal challenges over the past year, mostly tied to personnel affairs and has not only resolved those challenges but came to a conclusion that will make the Town fiscally strong for years to come. New staff has joined the Town's operations that will provide a level of succession planning that has not existed in the past.

The Town has also enhanced its revenue flexibility by establishing Enterprise funds. This has allowed the Town to shift one hundred percent (except for certain amounts of sewer debt where the general fund is responsible for its 40% share) of the operating cost and capital improvements to the users of sewer, water, and solid waste services so that no tax support goes towards providing these services. All related debt, except as discussed above, is funded through user fees. By doing so the Town is able to provide the maximum tax dollars available to all other services.

In 2016, the Town's legislative body successfully adopted a "meals tax" of .75% that is projected to generate approximately \$300,000 of "new" revenue each year.

Finally, the Town resolved the fiscal challenges left after the winter of 2015 and paid off over \$2 million of snow removal expenses. For the first time in the Town's history nearly \$400,000 had to be expended to remove volumes of snow from buildings' roofs. Fiscal constraint and sound management, with the personnel challenges the Town faced is evident by the result of funding the recording breaking winter expenses, and evident of the Town's fiscal strength.

Major Initiatives

Flood Insurance

In 2016 the FEMA appeals to correct the flood maps moved to a higher level of technical review. While the Town's appeal was successful and 400 homes were taken out of the new proposed flood zones; the maps still had technical errors that needed to be resolved. In order to address the remaining errors, under the law, the Town had to adopt the maps, with technical errors. In the fall of 2015 the Town overwhelmingly adopted the new flood maps, with the intention of pursuing the remaining errors. The Town will be seeking assistance from the federal legislators and support of the scientific consultant Woods Hole Group.

Building Projects

The Town has possibly the most popular skate board park in southeastern Massachusetts and a notable recreational facility, Peter Igo Park, both opened for business in 2016. Peter Igo Park's focal point may be tennis; but basketball, pickleball, and kayaking are also on the Parks itinerary. The Library Plaza development is underway and is expected to open in the spring of 2017.

Capital Assessment Project

The Town's Facility Manager completed the first total building assessment that will define the Town's future needs for maintenance and building improvements. This tool will help the Town's budgeting process and has initiated a dialogue to create a permanent building committee. The overall goal of the Town wide buildings assessment is to create a responsible maintenance plan for all the Town's buildings.

Reserves

Management has adopted reserve policies to address key areas of concern including: Operational Budget Reserve Fund, Stabilization Fund, Property and Liability Insurance Reserve, Workers Compensation for Police/Fire Reserve, Postemployment Liability Trust Fund and Town Compensated Absence Reserve.

The Town is rebuilding its Stabilization Fund after having used the fund to support the general fund budget in years 2003 through 2008. Over the last four years, the Town has increased the balance in the fund to \$2.3 million. Management phased out the use of one time revenues to fund the operational budget from \$6.7 million in 2004 to zero in the 2016 operating budget.

The Property & Liability Reserve will allow the Town to increase deductibles for general liability losses to decrease premium costs in future years. The Town Compensated Absence Reserve insulates the Town from the budgetary impact of unexpected retirements or separations from service of senior employees with those benefits.

Internal Controls

Management of the Town is responsible for establishing and maintaining an internal control structure designed to ensure the assets of the Town are protected from loss, theft or misuse and to ensure that adequate accounting data is compiled to allow for the preparation of financial statements in conformity with generally accepted accounting principles. The Town Administrator and the Fiscal Team are responsible for evaluating the adequacy and effectiveness of the internal control structure and implementing improvements. The Town completed a Fraud Risk Assessment that has become a guiding tool for all departments. Because the cost of internal controls should not outweigh their benefits, the Town of Marshfield's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free of material misstatement.

Budgetary Controls

The Town Administrator presents a budget to the Board of Selectmen which is then reviewed and with amendments presented to the Advisory Board. The nine-member Advisory Board holds public hearings to review all departmental budgets and makes recommendations on the budget to Town Meeting in April.

The level of budgetary control is established by Town Meeting and this approval defines the level at which expenditures may not exceed appropriations. This level is typically at the individual department salary and expense level. The Town Accountant is responsible for ensuring all payroll and invoices are within the budgetary control level before authorizing payment. Additional appropriations may be approved at subsequent Town

Meetings. The Advisory Board may approve during the year a transfer from a reserve fund established at Town Meeting. These controls ensure compliance with the budget approved by Town Meeting.

The Treasurer/Collector is responsible for cash and debt management, and the investment of Town funds.

The school budget is limited to the total amount appropriated by Town Meeting, but the School Committee retains full power to allocate the funds appropriated.

Financial Management

The Town adopted a policy in year 2011 to codify the allocation of indirect costs between the three Enterprise funds and the General Fund. A written agreement developed by the Fiscal Team, has been approved by the Board of Selectmen and the School Committee to codify the allocation of revenues and fixed costs between the school and Town departments based on existing verbal agreements. A free cash management agreement was adopted in April 2012 and a debt management policy was adopted in May 2012. Finally, additional reserves for uncompensated balances and capital projects are being considered for adoption in 2017.

Acknowledgements

We would like to express our appreciation to all the members of the departments who assisted and contributed to the preparation of this report. Also an expression of gratitude should be expressed to Team Leader Barbara Costa, Town Accountant who worked through a busy period to compile and finalize this report. Finally, credit must also be given to the Board of Selectmen and the Advisory Board for their unfailing support for maintaining the highest standards of professionalism in the management of the Town, including its finances.

Independent Auditor's Report

To the Honorable Board of Selectmen
Town of Marshfield, Massachusetts

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Marshfield, Massachusetts as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Marshfield, Massachusetts, as of June 30, 2016, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town of Marshfield, Massachusetts' basic financial statements. The introductory section, combining and individual fund statements, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual fund statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated February 27, 2017, on our consideration of the Town of Marshfield, Massachusetts' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town of Marshfield, Massachusetts' internal control over financial reporting and compliance.

Management's Discussion and Analysis

Management's Discussion and Analysis

As management of the Town of Marshfield, Massachusetts, we offer readers of these financial statements this narrative overview and analysis of the financial activities of the Town of Marshfield for the year ended June 30, 2016. We encourage readers to consider the information presented in this report in conjunction with additional information that we have furnished in our letter of transmittal.

The Governmental Accounting Standards Board (GASB) is the authoritative standard setting body that provides guidance on how to prepare financial statements in conformity with generally accepted accounting principles (GAAP). Users of these financial statements (such as investors and rating agencies) rely on the GASB to establish consistent reporting standards for all governments in the United States. This consistent application is the only way users (including citizens, the media, legislators and others) can assess the financial condition of one government compared to others.

Governments must adhere to GASB pronouncements in order to issue their financial statements in conformity with GAAP. The users of financial statements also rely on the independent auditor's opinion. If the Town's financial statements have significant departures from GAAP the independent auditors may issue a modified opinion or a disclaimer (where no opinion is given). These types of opinions may have an adverse effect on the Town's bond rating and our ability to borrow money at favorable interest rates. The Town has enjoyed an unmodified opinion on its financial statements for many years.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Town of Marshfield's basic financial statements. The Town's basic financial statements comprise three components: 1) government-wide financial statements 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the Town's finances, in a manner similar to private-sector businesses.

The statement of net position presents information on all of the Town's assets and deferred outflows of resources, liabilities and deferred inflows of resources, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The statement of activities presents information showing how the Town's net position changed during the most recent year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing or the related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities include general government, public safety, education, public works, health and human services, culture and recreation, community preservation, and interest. The business-type activities include the activities of the sewer, water, and solid waste enterprise funds.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Town, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Town is reporting three major governmental funds that are presented separately in the governmental fund financial statements. The remaining nonmajor funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements elsewhere in this report.

The Town adopts an annual appropriated budget for its general fund. A budgetary comparison schedule has been provided for the general fund to demonstrate compliance with this budget.

Proprietary funds. The Town maintains one type of proprietary fund.

Enterprise funds are used to report the same functions as business-type activities in the government-wide financial statements. The Town uses enterprise funds to account for its sewer, water, and solid waste activities. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for sewer, water, and solid waste activities, all of which are considered major funds of the Town.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the Town's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

Notes to financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Government-wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. Assets and deferred outflows exceeded liabilities and deferred inflows by \$157.2 million at the close of 2016.

Government-wide net position of \$202 million reflects its net investment in capital assets (e.g., land, buildings, machinery, equipment, and infrastructure) less any related debt used to acquire those assets that is still outstanding. The Town uses these capital assets to provide services to citizens; consequently, these assets are *not* available for future spending. Although the investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of net position, \$8 million, represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position resulted in a \$52.3 million deficit relating to the cumulative effect of recording \$34.4 million of other postemployment benefit liabilities and \$50.2 million of pension liabilities through June 30, 2016.

Details related to the Town's governmental and business-type activities follow.

Governmental activities. The governmental activities net position increased by approximately \$2.3 million during the current year as compared to an increase in net position of \$3.5 million during the prior year.

Financial notes related to governmental activities:

- Charges for services represented 5% of governmental activities resources. The Town can exercise more control over this category of revenue than any other. Fees charged for services rendered that are set by the Town are included in this category.
- Operating grants and contributions accounted for 26% of the governmental activities resources. Most of these resources apply to educational operations. These resources offset costs within the school department and supplement their general fund operating budget.
- Capital grants and contributions accounted for 6% of the governmental activities resources. Most of these resources apply to MSBA reimbursement for the High School construction project, funding related

to the Municipal Airport construction project, State grants for roadways improvements and community preservation State revenue.

- Property taxes are by far the most significant revenue source for the Town's governmental activities. They comprised 56% of current resources.
- All other taxes and other revenues comprised a total of 8% of the governmental activities resources. These primarily include excise taxes, community preservation taxes and nonrestricted grants and contributions.
- Education is by far the largest governmental activity of the Town. Approximately \$43.3 million in taxes and other revenue were needed to cover its 2016 operating expenses. A pension contribution of approximately \$7.8 million made by the state on-behalf of Marshfield teachers was recorded as an expense and grant revenue.
- Public safety and general government are the second and third largest activities of the Town. Approximately \$14.6 million and \$2.5 million, respectively, of taxes and other revenue were needed to cover their 2016 operating expenses.

Business-type activities. Business-type activities increased the Town's net position by \$2.1 million compared to a decrease of approximately \$226,000 during the previous year. Included in the results for 2016 were nonreciprocal transfers to the enterprise funds from nonmajor governmental funds in the amount of \$1.7 million.

The Sewer enterprise fund experienced a decrease in net position of approximately \$47,000 while the Water and Solid Waste enterprise funds both experienced increases in net position of \$1.7 million and \$439,000, respectively. Charges for services increased 9% when compared to the prior year while expenses for labor, operations, and depreciation increased just over 5%.

As shown below, business-type activities assets and deferred outflows exceeded liabilities and deferred inflows by \$57.8 million at the close of 2016. The net investment in capital assets is \$52.3 million (90%) while unrestricted net position is \$5.5 million (10%). These results continue to reflect management's goal of maintaining the systems while only charging users for the actual cost of operations.

Financial Analysis of the Government's Major Funds

As noted earlier, the Town of Marshfield uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the Town's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Town's financing requirements. In particular, the unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the year.

As of the end of the current year, governmental funds reported combined ending fund balances of \$14.6 million, an increase of \$5.1 million from the prior year. The increase mainly relates to timing differences in the nonmajor Town capital project funds where State grant revenue and bond proceeds exceeded expenditures.

General Fund

The General fund is the chief operating fund of the Town. At the end of the current year, the unassigned fund balance of the general fund was \$4.4 million, while the total fund balance was \$6.5 million. As a measure of the general fund's liquidity, it may be useful to compare both the unassigned fund balance and the total fund balance to total fund expenditures. The unassigned fund balance represents 5% of total general fund expenditures, while the total fund balance represents 7% of that same amount.

The fund balance of the General Fund decreased \$3.0 million during 2016. This change is mainly the result of a \$1.7 million transfer to the High School Capital Projects fund and a transfer of \$1.6 million to the nonmajor funds from prior year reserves.

Community Preservation Fund

The Community Preservation fund is used to account for the acquisition, creation, and preservation of open space, outdoor recreation, historical resources, and affordable housing. During the year the Town received \$1.9 million in assessments and state grants and had expenditures of \$2.5 million for various capital projects.

High School Capital Projects Fund

The High School Capital Projects fund is used to account for financial resources to be used for the construction of the new High School. During the year the Town issued \$177,000 in long-term bonds and \$5 million in BANs to fund the construction projects. The Town spent \$1.1 million on construction costs and was reimbursed \$747,000 million from the MSBA for high school construction costs. The fund balance increased \$1.5 million from the prior year after receiving a \$1.7 million transfer of prior year bond premiums from the general fund.

Proprietary funds. The Town's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

The Sewer enterprise fund is used to account for sewage treatment operations. Total revenues amounted to \$3,303,000 as compared to \$3,087,000 in the prior year and total expenses increased by \$364,000 from the prior year. Net position decreased by \$47,000 compared to a decrease of \$913,000 in the prior year.

The Water enterprise fund is used to account for water distribution operations. Total revenues amounted to \$4,660,000 as compared to \$4,291,000 in the prior year and expenses increased by \$423,000 from the prior year. Net position increased by \$1.7 million compared to an increase of \$368,000 in the prior year.

The Solid Waste fund is used to account for the Town's solid waste disposal operations. Total revenues amounted to \$3,426,000 as compared to \$3,032,000 in the prior year and expenses increased by \$494,000. Net position increased by \$439,000 compared to an increase of \$320,000 in the prior year.

General Fund Budgetary Highlights

The final general fund budget appropriations, including transfers, were approximately \$4 million higher than the original budget primarily due to transfers to the High School and Town capital project funds.

Total general fund revenues were slightly higher than budgeted amounts. Actual expenditures, including carryovers, were lower than budgeted amounts by approximately \$632,000, or just less than 1%.

Capital Asset and Debt Administration

In conjunction with the operating budget, the Town annually prepares a capital budget for the upcoming year and a five-year Capital Improvement Plan (CIP) that is used as a guide for future capital expenditures.

Governmental capital assets, net of accumulated depreciation, at year end amounted to approximately \$225 million which represented a net increase of \$164,000 from the prior year. Major current additions included School projects and infrastructure additions. Depreciation expense of \$10.9 million was recorded in year 2016 which increased \$5.2 million from the prior year. This increase can be attributable to the new High School being depreciated for the first year in 2016.

Enterprise fund capital assets, net of accumulated depreciation, were valued at \$68.6 million at year end. Current year additions totaled approximately \$3.1 million. Depreciation expense of \$2.2 million was recorded in year 2016.

The Town's total long-term debt increased by \$1.6 million during the current year. This was due to the net effect of \$10.8 million of proceeds for various governmental and enterprise projects and \$9.2 million of scheduled principal payments.

Outstanding long-term debt of the general government, as of June 30, 2016, totaled \$74.4 million, of which, \$51.5 million is related to school projects, \$1.6 million is related to the general government's 40% share of sewer debt, \$7.3 million is related to sea wall and harbor projects, \$3.5 million is related to qualified energy conservation bonds, leaving a balance of \$10.5 million for infrastructure and other Town projects.

The enterprise funds have \$17 million in sewer, water, and solid waste debt that is fully supported by the rates and do not rely on a general fund subsidy beyond the Town's bylaw that splits the debt service requirements of certain sewer projects on a ratio of 60% from the sewer fund and 40% from the general fund.

Please refer to footnotes 4, 6, and 7 for further discussion of the major capital asset and debt activity.

Requests for Information

This financial report is designed to provide a general overview of the Town of Marshfield's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Board of Selectmen, Town Hall, 870 Moraine Street, Marshfield, Massachusetts 02050-3498.

**RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF ACTIVITIES**

YEAR ENDED JUNE 30, 2016

Net change in fund balances - total governmental funds.....		\$ 5,060,955
<p>Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense:</p>		
Capital outlay.....	11,075,339	
Depreciation expense.....	<u>(10,911,178)</u>	
Net effect of reporting capital assets.....		164,161
<p>Revenues in the Statement of Activities that do not provide current financial resources are unavailable in the Statement of Revenues, Expenditures and Changes in Fund Balances. Therefore, the recognition of revenue for various types of accounts receivable (i.e., real estate and personal property, motor vehicle excise, etc.) differ between the two statements. This amount represents the net change in unavailable revenue.....</p>		
		899,549
<p>The issuance of long-term debt (e.g., bonds and leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are unavailable and amortized in the Statement of Activities:</p>		
Issuance of long-term debt.....	(7,852,500)	
Amortization of bond premium.....	612,677	
Debt service principal payments.....	<u>6,900,734</u>	
Net effect of reporting long-term debt.....		(339,089)
<p>Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds:</p>		
Net change in compensated absences accrual.....	(105,000)	
Net change in accrued interest on long-term debt.....	40,759	
Net change in other postemployment benefits accrual.....	(3,084,208)	
Net change in pension liability.....	(3,403,560)	
Net change in deferred outflow/(inflow) of resources related to pensions.....	<u>3,046,745</u>	
Net effect of recording long-term liabilities.....		<u>(3,505,264)</u>
Change in net position of governmental activities.....		<u>\$ 2,280,312</u>

See notes to basic financial statements.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying basic financial statements of the Town of Marshfield, Massachusetts (the Town) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The Governmental Accounting Standards Board (GASB) is the recognized standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting policies are described herein.

A. Reporting Entity

The Town of Marshfield, Massachusetts, was incorporated in 1640, and has a Town Meeting form of government with administrative authority vested in a three-member Board of Selectmen and an appointed Town Administrator. The Town's major operations include police and fire protection, parks, library, recreation, public works, education, and general administrative services. In addition, the Town owns and operates a water system, sewer system and a solid waste transfer station.

For financial reporting purposes, the Town has included all funds, organizations, agencies, boards, commissions and institutions. The Town has also considered all potential component units for which it is financially accountable as well as other organizations for which the nature and significance of their relationship with the Town are such that exclusion would cause the basic financial statements to be misleading or incomplete. As required by GAAP, these basic financial statements present the Town (the primary government) and its component units. It has been determined that the Town has no component units that require inclusion in these basic financial statements.

B. Government-Wide and Fund Financial Statements***Government-Wide Financial Statements***

The government-wide financial statements (i.e., statement of net position and the statement of changes in net position) report information on all of the non-fiduciary activities of the primary government and its component units.

Governmental activities, which are primarily supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which are supported primarily by user fees and charges.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements. Nonmajor funds are aggregated and displayed in a single column.

Major Fund Criteria

Major funds must be reported if the following criteria are met:

- If the total assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues, or expenditures/expenses of an individual governmental or enterprise fund are at least 10 percent of the corresponding element (assets, liabilities, etc.) for all funds of that category or type (total governmental or total enterprise funds), *and*

- If the total assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues, or expenditures/expenses of the individual governmental fund or enterprise fund are at least 5 percent of the corresponding element for all governmental and enterprise funds combined.

Additionally, any other governmental or enterprise fund that management believes is particularly significant to the basic financial statements may be reported as a major fund.

Fiduciary funds are reported by fund type.

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

Government-Wide Financial Statements

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred. Real estate and personal property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The statement of activities demonstrates the degree to which the direct expenses of a particular function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include the following:

- Charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment.
- Grants and contributions that are restricted to meeting the operational requirements of a particular function or segment.
- Grants and contributions that are restricted to meeting the capital requirements of a particular function or segment.

Taxes and other items not identifiable as program revenues are reported as general revenues.

For the most part, the effect of interfund activity has been removed from the government-wide financial statements. Exceptions are charges between the general fund and sewer, water and solid waste enterprise funds. Elimination of these charges would distort the direct costs and program revenues reported for the functions affected.

Fund Financial Statements

Governmental fund financial statements are reported using the flow of current financial resources measurement focus and the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when measurable and available). Measurable means the amount of the transaction can be determined and available means collectible within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures are recorded when the related fund liability is incurred, except for unmatured interest on general long-term debt which is recognized when due, and certain compensated absences, claims and judgments which are recognized when the amounts have matured or are due and payable.

Real estate and personal property tax revenues are considered available if they are collected within 60 days after year-end. Investment income is susceptible to accrual. Other receipts and tax revenues become measurable and available when the cash is received and are recognized as revenue at that time.

Entitlements and shared revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria is met. Expenditure driven grants recognize revenue when the qualifying expenditures are incurred and all other grant requirements are met.

The following major governmental funds are reported:

The *General fund* is the primary operating fund. It is used to account for all financial resources, except those that are required to be accounted for in another fund.

The *Community Preservation fund* is used to account for funds received in accordance with the Community Preservation Act (the CPA). Funds are received under the CPA through a surcharge of up to 3% of the real property tax levy and matching state grants. The funds are spent for the acquisition, creation, and preservation of open space, outdoor recreation, historical resources, and affordable housing.

The *High School Capital Project fund* is used to account for financial resources to expand and upgrade the High School.

The nonmajor governmental funds consist of special revenue and permanent funds that are aggregated and presented in the *nonmajor governmental funds* column on the governmental funds financial statements. The following describes the general use of these fund types:

The *special revenue fund* is used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than permanent funds or capital projects.

The *capital projects fund* is used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets of the governmental funds.

The *permanent fund* is used to account for and report financial resources that are legally restricted to the extent that only earnings, not principal, may be used for purposes that support the governmental programs.

Proprietary fund financial statements are reported using the flow of economic resources measurement focus and use the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the proprietary funds principal ongoing operations. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The following major proprietary funds are reported:

The *Sewer enterprise fund* is used to account for sewage treatment operations of the department of public works that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges.

The *Water enterprise fund* is used to account for water distribution operations of the department of public works that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges.

The *Solid Waste enterprise fund* is used to account for the Town's solid waste disposal operations of the public works that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges.

Fiduciary fund financial statements are reported using the flow of economic resources measurement focus and use the accrual basis of accounting. Fiduciary funds are used to account for assets held in a trustee capacity for others that cannot be used to support the governmental programs.

The following fiduciary fund types are reported:

The *private-purpose trust fund* is used to account for trust arrangements that exclusively benefit individuals, private organizations, or other governments. Some of these trusts have donor restrictions and trustee policies that do not allow the endowment portion and any unrealized appreciation to be spent. The restrictions and trustee policies only allows the trustees to approve spending of the realized investment earnings. The Town mainly uses this fund to account for educational scholarships. An insignificant portion of the fund is used to account for the Town's cemetery trusts.

The *agency fund* is used to account for assets held in a purely custodial capacity. The Town's agency funds consist of off-duty work details, performance bonds, and fees collected on behalf of other governments. Agency funds apply the accrual basis of accounting for purposes of asset and liability recognition, but do not have a measurement focus.

D. Cash and Investments

Government-Wide and Fund Financial Statements

Cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with an original maturity of three months or less from the date of acquisition.

Investments are carried at fair value. The fair values were determined by the closing price for those securities traded on national stock exchanges and the average bid-and-ask quotation for those securities traded in the over-the-counter market.

E. Fair Value Measurements

The Town reports required types of financial instruments in accordance with the fair value standards. These standards require an entity to maximize the use of observable inputs (such as quoted prices in active markets) and minimize the use of unobservable inputs (such as appraisals or valuation techniques) to determine fair value. Fair value standards also require the government to classify these financial instruments into a three-level hierarchy, based on the priority of inputs to the valuation technique or in accordance with net asset value practical expedient rules, which allow for either Level 2 or Level 3 depending on lock up and notice periods associated with the underlying funds.

Instruments measured and reported at fair value are classified and disclosed in one of the following categories:

Level 1 – Quoted prices are available in active markets for identical instruments as of the reporting date. Instruments, which are generally included in this category, include actively traded equity and debt securities, U.S. government obligations, and mutual funds with quoted market prices in active markets.

Level 2 – Pricing inputs are other than quoted in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Certain fixed income securities, primarily corporate bonds, are classified as Level 2 because fair values are estimated using pricing models, matrix pricing, or discounted cash flows.

Level 3 – Pricing inputs are unobservable for the instrument and include situations where there is little, if any, market activity for the instrument. The inputs into the determination of fair value require significant management judgment or estimation.

In some instances the inputs used to measure fair value may fall into different levels of the fair value hierarchy and is based on the lowest level of input that is significant to the fair value measurement.

Market price is affected by a number of factors, including the type of instrument and the characteristics specific to the instrument. Instruments with readily available active quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. It is reasonably possible that change in values of these instruments will occur in the near term and that such changes could materially affect amounts reported in these financial statements. For more information on the fair value of the Town's financial instruments, see Note 2 – Cash and Investments.

F. Accounts Receivable

Government-Wide and Fund Financial Statements

The recognition of revenue related to accounts receivable reported in the government-wide financial statements and the proprietary funds and fiduciary funds financial statements are reported under the accrual basis of accounting. The recognition of revenue related to accounts receivable reported in the governmental funds financial statements are reported under the modified accrual basis of accounting.

Real Estate, Personal Property Taxes and Tax Liens

Real estate and personal property taxes are levied and based on values assessed on January 1st of every year. Assessed values are established by the Board of Assessor's for 100% of the estimated fair market value. Real estate and personal property taxes are billed on a quarterly basis. The first two quarters (August 1st and November 1st) are preliminary tax bills based upon the previous year's total annual tax. The second two quarters (February 1st and May 1st) are actual tax, reflecting the current year assessment and the current tax rate. Taxes due and unpaid are subject to penalties and interest if they are not paid by the respective due date. The Town has an ultimate right to foreclose on property for which taxes have not been paid. Real estate and personal property taxes levied are recorded as receivables in the year of the levy and are recorded under the modified accrual basis of accounting.

Real estate tax liens are processed after the tax bills are sent and are recorded as receivables in the year they are processed.

Real estate receivables are secured via the tax lien process and are considered 100% collectible. Accordingly, an allowance for uncollectible accounts is not reported.

Personal property taxes cannot be secured through the lien process. The allowance of uncollectible accounts is estimated based on historical trends and specific account analysis.

Motor Vehicle and Other Excise Taxes

Motor vehicle excise taxes are assessed annually for each vehicle registered and are recorded as receivables in the year of the levy. The Commonwealth is responsible for reporting the number of vehicles registered and the fair values of those vehicles. The tax calculation is the fair value of the vehicle multiplied by \$25 per \$1,000 of value.

Boat excise taxes are assessed annually for each boat registered and are recorded as receivables in the year of the levy. The Commonwealth is responsible for reporting the number of boats registered and the fair value of those boats. The tax calculation is the fair value of the boat multiplied by \$10 per \$1,000 of value.

The allowance for uncollectible accounts is estimated based on historical trends and specific account analysis.

User Charges

User fees are levied semi-annually based on individual meter readings and are subject to penalties and interest if they are not paid by the respective due date. Unbilled user fees are estimated at year-end and are recorded as revenue in the current period. Water, Sewer, and Solid Waste liens are processed in December of every year and included as a lien on the property owner's tax bill. Water, Sewer and Solid Waste charges and liens are recorded as receivables in the year of the levy.

Since the receivables are secured via the lien process, these accounts are considered 100% collectible and therefore do not report an allowance for uncollectible accounts.

Departmental and Other

Departmental and other receivables consist primarily of ambulance charges and veterans benefits and are recorded as receivables in the year accrued. The allowance of uncollectible accounts is estimated based on historical trends and specific account analysis.

Special Assessments

Special assessments consist of sewer construction and particular apportioned street and water line betterments. These receivables are considered to be 100% collectible and therefore do not report an allowance for uncollectible accounts.

Intergovernmental

Various federal and state grants for operating and capital purposes are applied for and received annually. For non-expenditure driven grants, receivables are recorded as soon as all eligibility requirements imposed by the provider have been met. For expenditure driven grants, receivables are recorded when the qualifying expenditures are incurred and all other grant requirements are met.

These receivables are considered 100% collectible and therefore do not report an allowance for uncollectible accounts.

G. Inventories***Government-Wide and Fund Financial Statements***

Inventories are recorded as expenditures at the time of purchase. Such inventories are not material in total to the government-wide and fund financial statements, and therefore are not reported.

H. Capital Assets*Government-Wide and Proprietary Fund Financial Statements*

Capital assets, which include land, land improvements, buildings, machinery and equipment, vehicles and infrastructure (e.g., roads, water mains, sewer mains, and similar items), are reported in the applicable governmental or business-type activity column of the government-wide financial statements, and the proprietary fund financial statements. Capital assets are recorded at historical cost, or at estimated historical cost, if actual historical cost is not available. Donated capital assets are recorded at the estimated fair market value at the date of donation. Except for the capital assets of the governmental activities column in the government-wide financial statements, construction period interest is capitalized on constructed capital assets.

All purchases and construction costs in excess of \$25,000 are capitalized at the date of acquisition or construction, respectively, with expected useful lives of greater than one year.

Capital assets (excluding land and construction-in-progress) are depreciated on a straight-line basis over the estimated useful life of the assets. The estimated useful lives of capital assets are as follows:

<u>Capital Asset Type</u>	<u>Estimated Useful Life (in years)</u>
Buildings and improvements.....	20-40
Improvements other than buildings.....	20-30
Machinery and equipment.....	3-20
Vehicles.....	5
Books, software and other.....	5
Infrastructure.....	20-50

The cost of normal maintenance and repairs that do not add to the value of the assets or materially extend asset lives are not capitalized and are treated as expenses when incurred. Improvements are capitalized.

Governmental Fund Financial Statements

Capital asset costs are recorded as expenditures in the acquiring fund in the year of the purchase.

I. Interfund Receivables and Payables

During the course of its operations, transactions occur between and within individual funds that may result in amounts owed between funds.

Government-Wide Financial Statements

Transactions of a buyer/seller nature between and within governmental funds are eliminated from the governmental activities in the statement of net position. Any residual balances outstanding between the governmental activities and business-type activities are reported in the statement of net position as "internal balances".

Fund Financial Statements

Transactions of a buyer/seller nature between and within funds are *not* eliminated from the individual fund statements. Receivables and payables resulting from these transactions are classified as “Due from other funds” or “Due to other funds” on the balance sheet.

J. Deferred Outflows/Inflows of Resources*Government-Wide Financial Statements (Net Position)*

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Town has reported deferred outflows of resources related to pensions in this category.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Town has reported deferred inflows of resources related to pensions in this category.

Fund Financial Statements

In addition to liabilities, the governmental funds balance sheet will sometimes report a separate section for deferred inflows of resources. This financial statement element, deferred inflows of resources, represents assets that have been recorded in the governmental fund financial statements but the revenue is not available and so will *not* be recognized as an inflow of resources (revenue) until it becomes available. The Town has recorded unavailable revenue as deferred inflows of resources in the governmental funds balance sheet.

K. Interfund Transfers

During the course of its operations, resources are permanently reallocated between and within funds. These transactions are reported as transfers in and transfers out.

Government-Wide Financial Statements

Transfers between and within governmental funds and internal service funds are eliminated from the governmental activities in the statement of net position. Any residual balances outstanding between the governmental activities and business-type activities are reported in the statement of activities as “Transfers, net”.

Fund Financial Statements

Transfers between and within funds are *not* eliminated from the individual fund statements and are reported as transfers in and transfers out.

L. Unavailable Revenue

Unavailable revenue at the governmental fund financial statement level represent billed receivables that do not meet the available criterion in accordance with the current financial resources measurement focus and the modified accrual basis of accounting, i.e. receivables that are not considered to be available to liquidate liabilities of the current period. Unavailable revenue is recognized as revenue in the conversion to government-wide (full accrual) financial statements.

M. Net Position and Fund Equity

Government-Wide Financial Statements (Net Position)

Net position reported as “net investment in capital assets” includes capital assets, net of accumulated depreciation, less the principal balance of outstanding debt used to acquire capital assets. Unspent proceeds of capital related debt are not considered to be capital assets. Outstanding debt related to future reimbursements from the state’s school building program is not considered to be capital related debt.

Net position is reported as restricted when amounts that are not available for appropriation or are legally restricted by outside parties for a specific future use.

Net position has been “restricted for” the following:

“Permanent funds – expendable” represents the amount of realized and unrealized investment earnings of donor restricted trusts. The restrictions and trustee policies only allows the trustees to approve spending of the realized investment earnings.

“Permanent funds – nonexpendable” represent the endowment portion of donor restricted trusts.

“Gifts and Grants” represents restrictions placed on assets from outside parties.

“Community preservation” represents amounts held for uses restricted by law for community preservation purposes.

Sometimes the Town will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Town’s policy to consider restricted net position to have been depleted before unrestricted net position is applied.

Fund Financial Statements (Fund Balances)

Governmental fund balances are classified as nonspendable, restricted, committed, assigned, or unassigned based on the extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent.

The governmental fund balance classifications are as follows:

“Nonspendable” fund balance includes amounts that cannot be spent because they are either not in spendable form or they are legally or contractually required to be maintained intact.

“Restricted” fund balance includes amounts subject to constraints placed on the use of resources that are either externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; or that are imposed by law through constitutional provisions or enabling legislation.

“Committed” fund balance includes amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the government’s highest level of decision-making authority. Town Meeting is the highest level of decision making authority that can, by adoption of Town Meeting warrant article, commit funds for a specific purpose. Once voted, the limitation imposed by the vote remains in place until the funds are used for their intended purpose or a vote is taken to rescind the commitment.

“Assigned” fund balance includes amounts that are constrained by the Town’s intent to be used for specific purposes, but are neither restricted nor committed. The Town’s by-laws authorize the Town Accountant to assign fund balance. Assignments generally only exist temporarily. Additional action does not have to be taken for the removal of an assignment.

“Unassigned” fund balance includes the residual classification for the general fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the general fund.

The Town’s spending policy is to spend restricted fund balance first, followed by committed, assigned and unassigned fund balance. Most governmental funds are designated for one purpose at the time of their creation. Therefore, any expenditure from the fund will be allocated to the applicable fund balance classifications in the order of the aforementioned spending policy. The general fund and certain other funds may have more than one purpose.

N. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Plymouth County Contributory Retirement System and the Massachusetts Teachers Retirement System and additions to/deductions from the Systems fiduciary net position have been determined on the same basis as they are reported by the Systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

O. Long-term Debt

Government-Wide and Proprietary Fund Financial Statements

Long-term debt is reported as liabilities in the government-wide and proprietary fund statement of net position. Material bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount.

Governmental Fund Financial Statements

The face amount of governmental funds long-term debt is reported as other financing sources. Bond premiums and discounts, as well as issuance costs, are recognized in the current period. Bond premiums are reported as other financing sources and bond discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual bond proceeds received, are reported as general government expenditures.

P. Investment Income

Excluding the permanent funds, investment income derived from major and nonmajor governmental funds is legally assigned to the general fund unless otherwise directed by Massachusetts General Law (MGL).

Investment income from Enterprise Funds is retained in their respective funds.

Q. Compensated Absences

Employees are granted vacation and sick leave in varying amounts based on collective bargaining agreements, state laws and executive policies.

Government-Wide and Proprietary Fund Financial Statements

Vested or accumulated vacation and sick leave are reported as liabilities and expensed as incurred.

Fund Financial Statements

Vested or accumulated vacation and sick leave, which will be liquidated with expendable available financial resources, are reported as expenditures and fund liabilities upon maturity of the liability, i.e. unused reimbursable leave still outstanding following an employee's resignation or retirement.

R. Use of Estimates*Government-Wide and Fund Financial Statements*

The preparation of basic financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure for contingent assets and liabilities at the date of the basic financial statements and the reported amounts of the revenues and expenditures/expenses during the year. Actual results could vary from estimates that were used.

S. Total Column*Government-Wide Financial Statements*

The total column presented on the government-wide financial statements represents consolidated financial information.

Fund Financial Statements

The total column on the fund financial statements is presented only to facilitate financial analysis. Data in this column is not the equivalent of consolidated financial information.

T. Individual Fund Deficits

Fund deficits exist at June 30, 2016 in the Airport and Town Capital Project nonmajor funds. These deficits will be funded with bond proceeds and other available funds in future years.

NOTE 2 – CASH AND INVESTMENTS

A cash and investment pool is maintained that is available for use by all funds. Each fund type's portion of this pool is displayed on the balance sheet as "Cash and Cash Equivalents". The deposits and investments of the trust funds are held separately from those of other funds.

Statutes authorize the investment in obligations of the U.S. Treasury, agencies, and instrumentalities, certificates of deposit, repurchase agreements, money market accounts, bank deposits and the State Treasurer's Investment Pool (the Pool). The Treasurer may also invest trust funds in securities, other than mortgages or collateral loans, which are legal for the investment of funds of savings banks under the laws of the Commonwealth.

The Pool meets the criteria of an external investment pool. The Pool is administered by the Massachusetts Municipal Depository Trust (MMDT), which was established by the Treasurer of the Commonwealth who serves as Trustee. The fair value of the position in the Pool is the same as the value of the Pool shares.

Custodial Credit Risk – Deposits

In the case of deposits, this is the risk that in the event of a bank failure, the Town of Marshfield's deposits may not be returned to it. The Town's policy limits its exposure to custodial credit risk through diversification and prudent selection of investment instruments, choice of depository, and collateralization of balances where practical.

At year-end, the carrying amount of deposits totaled \$22,758,673 and the bank balance totaled \$24,833,983. Of the bank balance, \$2,495,238 was covered by Federal Depository Insurance, \$366,952 was covered by Share Insurance Fund (SIF), \$584,787 was covered by Deposit Insurance Fund (DIF), \$12,243,891 was collateralized and \$9,143,115 was exposed to custodial credit risk because it was uninsured and uncollateralized.

Investments

As of June 30, 2016, the Town had the following investments and maturities:

Investment Type	Maturity		
	Fair Value	Under 1 Year	Rating
<u>Debt Securities</u>			
Repurchase Agreement.....	\$ 7,700,000	\$ <u>7,700,000</u>	AA+
<u>Other Investments</u>			
Domestic Equity Securities.....	277,923		
Money Market Mutual Funds.....	819,881		
MMDT.....	<u>1,978,805</u>		
Total Investments.....	\$ <u>10,776,609</u>		

MMDT maintains a cash portfolio and a short-term bond fund with combined average maturities of approximately 2 months. The Town's investment in MMDT is unrated. All of the investments, except for the equity securities, are considered cash and cash equivalents.

Custodial Credit Risk – Investments

For an investment, this is the risk that, in the event of a failure by the counterparty, the Town will not be able to recover the value of its investments or collateral security that are in the possession of an outside party. The Town has custodial credit risk exposure equal to \$7,700,000 in debt securities and \$277,923 in equity securities because the related securities are uninsured, unregistered and held by the counterparty.

The Town does not have an investment policy for custodial credit risk.

Interest Rate Risk

Interest rate risk exists when there is a possibility that changes in interest rates could adversely affect the fair value of the Town's investments. The Town does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Credit Risk

The Town restricts investments to only the following: obligations of the U.S. Government and foreign governments and their agencies or instrumentalities, banks (including certificates of deposit, time deposits, and bankers'

acceptances located in the U.S.), short-term debt obligations, and overnight and term repurchase agreements and reverse purchase agreements secured by any of the obligations previously listed. The Treasurer may invest in MMDT.

Concentration of Credit Risk

The Town restricts holdings to no more than 10% of the net investment in securities of any one issuer, except investments in securities of the U.S. Government, its agencies or instrumentalities, or in repurchase agreements collateralized fully by such obligations. No more than 25% may be invested in any one industry except there is no limitation on the percentage that may be invested in the financial services industry. With the exception of U.S. Treasury obligations or investments fully collateralized by U.S. Treasuries or agencies, and MMDT, no more than 10% of the Town's investments shall be invested in a single financial institution.

Fair Market Value of Investments

The Town holds investments that are measured at fair value on a recurring basis. Because investing is not a core part of the Town's mission, the Town determines that the disclosures related to these investments only need to be disaggregated by major type. The Town chooses a tabular format for disclosing the levels within the fair value hierarchy.

The Town categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair values of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The Town has the following recurring fair value measurements as of June 30, 2016:

<u>Investment Type</u>	<u>June 30, 2016</u>	<u>Quoted Prices in Active Markets for Identical Assets (Level 1)</u>	<u>Significant Other Observable Inputs (Level 2)</u>	<u>Significant Unobservable Inputs (Level 3)</u>
Investments measured at fair value:				
<u>Debt Securities</u>				
Repurchase Agreement.....	\$ 7,700,000	\$ 7,700,000	\$ -	\$ -
<u>Other Investments</u>				
Domestic Equity Securities.....	277,923	277,923	-	-
Money Market Mutual Funds.....	819,881	819,881	-	-
Total Other Investments.....	1,097,804	1,097,804	-	-
Total investments measured at fair value.....	8,797,804	\$ 8,797,804	\$ -	\$ -
Investments measured at amortized cost:				
MMDT.....	1,978,805			
Total investments.....	\$ 10,776,609			

Repurchase agreements, domestic equity securities, and money market mutual funds classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities.

MMDT investments are valued at amortized cost. Under the amortized cost method, an investment is valued initially at its cost and adjusted for the amount of interest income accrued each day over the term of the investment to account for any difference between the initial cost and the amount payable at maturity. If amortized cost is determined not to approximate fair value, the value of the portfolio securities will be determined under procedures established by the Advisor.

NOTE 3 – RECEIVABLES

At June 30, 2016, receivables for the individual major and nonmajor governmental funds in the aggregate, including the applicable allowances for uncollectible accounts, are as follows:

	Gross Amount	Allowance for Uncollectibles	Net Amount
<u>Receivables:</u>			
Real estate, personal property and tax deferrals.....	\$ 4,043,702	\$ (24,524)	\$ 4,019,178
Tax liens.....	666,046	-	666,046
Motor vehicle and other excise taxes.....	1,104,845	(182,024)	922,821
Departmental and other.....	1,249,989	(151,532)	1,098,457
Intergovernmental.....	8,791,035	-	8,791,035
Total.....	<u>\$ 15,855,617</u>	<u>\$ (358,080)</u>	<u>\$ 15,497,537</u>

At June 30, 2016, receivables for the sewer, water, and solid waste enterprise funds consist of the following:

	Gross Amount	Allowance for Uncollectibles	Net Amount
<u>Receivables:</u>			
User charges.....	\$ 5,303,795	\$ -	\$ 5,303,795
Special assessments.....	1,648,458	-	1,648,458
Intergovernmental.....	570,452	-	570,452
Total.....	<u>\$ 7,522,705</u>	<u>\$ -</u>	<u>\$ 7,522,705</u>

Governmental funds report unavailable revenue in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. At the end of the current year, the various components of unavailable revenue reported in the governmental funds were as follows:

	General Fund	Community Preservation Fund	Other Governmental Funds	Total
<u>Receivable and other asset type:</u>				
Real estate and personal property taxes.....	\$ 3,594,169	\$ -	\$ -	\$ 3,594,169
Tax liens.....	666,046	-	-	666,046
Motor vehicle and other excise.....	922,821	-	-	922,821
Departmental and other.....	1,056,940	41,517	-	1,098,457
Intergovernmental.....	5,336,969	302,588	1,067,092	6,706,649
Tax foreclosures.....	576,793	-	-	576,793
Total.....	<u>\$ 12,153,738</u>	<u>\$ 344,105</u>	<u>\$ 1,067,092</u>	<u>\$ 13,564,935</u>

NOTE 4 – CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2016, was as follows:

Governmental Activities

	Beginning Balance	Increases	Decreases	Ending Balance
<u>Capital assets not being depreciated:</u>				
Land.....	\$ 27,778,749	\$ 377,531	\$ -	\$ 28,156,280
Construction in progress.....	33,461,184	809,775	(33,002,137)	1,268,822
Total capital assets not being depreciated.....	<u>61,239,933</u>	<u>1,187,306</u>	<u>(33,002,137)</u>	<u>29,425,102</u>
<u>Capital assets being depreciated:</u>				
Improvements other than buildings.....	1,807,703	849,589	-	2,657,292
Buildings and improvements.....	154,622,659	33,184,706	-	187,807,365
Machinery and equipment.....	15,276,944	211,800	(157,000)	15,331,744
Vehicles.....	5,775,212	173,418	(27,142)	5,921,488
Books, software and other.....	5,405,053	184,351	-	5,589,404
Infrastructure.....	60,966,964	8,286,306	-	69,253,270
Total capital assets being depreciated.....	<u>243,854,535</u>	<u>42,890,170</u>	<u>(184,142)</u>	<u>286,560,563</u>
<u>Less accumulated depreciation for:</u>				
Improvements other than buildings.....	(359,512)	(10,989)	-	(370,501)
Buildings and improvements.....	(32,753,646)	(7,975,833)	-	(40,729,479)
Machinery and equipment.....	(13,235,586)	(441,475)	157,000	(13,520,061)
Vehicles.....	(4,032,280)	(422,679)	27,142	(4,427,817)
Books, software and other.....	(3,894,774)	(148,688)	-	(4,043,462)
Infrastructure.....	(25,910,271)	(1,911,514)	-	(27,821,785)
Total accumulated depreciation.....	<u>(80,186,069)</u>	<u>(10,911,178)</u>	<u>184,142</u>	<u>(90,913,105)</u>
Total capital assets being depreciated, net.....	<u>163,668,466</u>	<u>31,978,992</u>	<u>-</u>	<u>195,647,458</u>
Total governmental activities capital assets, net.....	<u>\$ 224,908,399</u>	<u>\$ 33,166,298</u>	<u>\$ (33,002,137)</u>	<u>\$ 225,072,560</u>

Business-Type Activities

	Beginning Balance	Increases	Decreases	Ending Balance
<u>Capital assets not being depreciated:</u>				
Land.....	\$ 7,452,270	\$ -	\$ -	\$ 7,452,270
Construction in progress.....	629,606	-	(629,606)	-
Total capital assets not being depreciated.....	8,081,876	-	(629,606)	7,452,270
<u>Capital assets being depreciated:</u>				
Buildings and improvements.....	15,989,754	153,472	-	16,143,226
Machinery and equipment.....	7,103,981	286,533	(433,314)	6,957,200
Vehicles.....	1,575,516	43,228	-	1,618,744
Infrastructure.....	87,284,319	3,281,596	-	90,565,915

NOTE 5 – INTERFUND RECEIVABLES, PAYABLES AND TRANSFERS

Interfund receivables and payables between funds at June 30, 2016, are summarized as follows:

Receivable Fund	Payable Fund	Amount
Town General Revolving Fund	Airport Fund	\$ 37,619 (1)
Town General Revolving Fund	Chapter 90 Fund	261,000 (1)
Total.....		<u>\$ 298,619</u>

(1) Represents advances between funds to meet temporary cash flow needs.

Interfund transfers for the year ended June 30, 2016, are summarized as follows:

Transfers Out:	Transfers In:						Total
	General Fund	High School Capital Projects	Nonmajor Governmental Funds	Sewer Fund	Water Fund	Solid Waste Fund	
General Fund.....	\$ -	\$ 1,693,736	\$ 1,615,213	\$ -	\$ -	\$ -	\$ 3,308,949 (1)
Nonmajor Governmental Funds.....	93,502	-	3,480	698,685	812,129	174,832	1,782,628 (2)
Total.....	<u>\$ 93,502</u>	<u>\$ 1,693,736</u>	<u>\$ 1,618,693</u>	<u>\$ 698,685</u>	<u>\$ 812,129</u>	<u>\$ 174,832</u>	<u>\$ 5,091,577</u>

- (1) Represents budgeted transfers from the general fund to the High School capital project fund, the nonmajor Town capital projects fund, and to other nonmajor funds.
- (2) Represents budgeted transfers into the general fund from nonmajor governmental funds and from the expendable trust funds, as well as for transfers between various nonmajor funds. Also included are transfers from the nonmajor capital article fund to the sewer, water and solid waste enterprise funds.

NOTE 6 – SHORT-TERM FINANCING

Short-term debt may be authorized and issued to fund the following:

- Current operating costs prior to the collection of revenues through issuance of revenue or tax anticipation notes (RANS or TANS).
- Capital project costs and other approved expenditures incurred prior to obtaining permanent financing through issuance of bond anticipation notes (BANS) or grant anticipation notes (GANS).

Short-term loans are general obligations of the Town and carry maturity dates that are limited by statute. Interest expenditures for short-term borrowings are accounted for in the General Fund and the Enterprise funds, where applicable.

Details related to the Town's short-term debt activity for the year ended June 30, 2016, is as follows:

Type	Purpose	Rate (%)	Due Date	Balance at June 30, 2015	Renewed/ Issued	Retired/ Redeemed	Balance at June 30, 2016

On the scheduled due date of July 29, 2016, \$8.8 million of BANS were converted to long-term debt and have been presented as such in these financial statements. Of the \$5.6 million of other BANS due on July 29, 2016, \$5.0 million was rolled into a new BAN with an interest rate of 1.5% due on July 28, 2017, and the remaining \$616,000 was paid down.

NOTE 7 - LONG-TERM DEBT

Under the provisions of Chapter 44, Section 10, Municipal Law authorizes indebtedness up to a limit of 5% of the equalized valuation. Debt issued in accordance with this section of the law is designated as being "inside the debt limit". In addition, however, debt may be authorized in excess of that limit for specific purposes. Such debt, when issued, is designated as being "outside the debt limit".

The Town's bylaws currently provide for a split between the general fund and the sewer fund for the debt service requirements of certain (issuances prior to FY06) sewer long-term debt. The general fund and the sewer fund are each responsible for their 40% and 60% share of the debt service, respectively.

Details related to the Town's outstanding general obligation indebtedness at June 30, 2016, and the debt service requirements follow.

Bonds Payable Schedule – Governmental Funds

Project	Maturity Through	Original Loan Amount	Interest Rate (%)	Outstanding at June 30, 2015	Issued	Redeemed	Outstanding at June 30, 2016

2020.....	5,750,686	1,516,321	7,267,007
2021.....	5,531,065	1,310,399	6,841,464
2022 - 2026....	17,918,282	4,307,187	22,225,469
2027 - 2031....	16,150,246	1,850,739	18,000,985
2032 - 2036....	9,104,147	316,855	9,421,002
2037.....	125,000	-	125,000
Total.....	\$ 74,354,016	\$ 15,089,771	\$ 89,443,787

The Town is scheduled to be subsidized by the Massachusetts Clean Water Trust (MCWT) on a periodic basis for principal in the amount of \$380,301 and interest costs for \$150,708. Thus, net MCWT loan repayments, including interest, are scheduled to be \$1,302,482. The principal subsidies are guaranteed and therefore a \$380,301 intergovernmental receivable and corresponding revenue have been reported in the General Fund. Since the Town is legally obligated for the total amount of the debt, such amounts have been reported in the accompanying basic financial statements. Principal and interest subsidies totaled \$52,060 and \$45,279, respectively in 2016.

The Town has been approved to receive school construction assistance through the Massachusetts School Building Authority (MSBA). The MSBA provides resources for eligible construction costs and debt interest and borrowing costs. Reimbursement commenced in 2002 and will be made over 20 years at approximately 67% of eligible costs of the Martinson Elementary School and Furnace Brook Middle School projects. During 2016, approximately \$1,113,000 of such assistance was received. Approximately \$5,564,000 will be received in future years. Of this amount, approximately \$608,000 represents reimbursement of long-term interest costs, and approximately \$4,957,000 represents reimbursement of approved construction costs. Accordingly, \$4,957,000

intergovernmental receivable and corresponding unavailable revenue has been recorded in the fund based financial statements and the change in the receivable has been recognized as revenue in the conversion to the government-wide financial statements.

The Commonwealth has modified the method for funding new projects in the school building assistance program. Under the new program, the assistance is paid to support the State's share of construction costs as they are incurred, therefore eliminating the need for the Town to fund the State's share through long-term debt. The Marshfield High School project is being partially funded by this program at an eligible cost rate of 55.6%. The Town received \$480,883 of reimbursements in 2016 and submitted an additional request of \$1,136,456 for reimbursement of construction costs incurred through June 30, 2016. Accordingly, the Town has recorded an intergovernmental receivable totaling \$1,136,456 as of June 30, 2016.

Bonds Payable Schedule – Sewer Enterprise Fund

Project	Maturity Through	Original Loan Amount	Interest Rate (%)	Outstanding at June 30, 2015	Issued	Redeemed	Outstanding at June 30, 2016

Total.....	\$ 7,363,569	\$ 1,262,253	\$ 8,625,822

The Town is scheduled to be subsidized by the Massachusetts Clean Water Trust (MCWT) on a periodic basis for principal in the amount of \$570,452 and interest costs for \$226,064. Thus, net MCWT loan repayments, including interest, are scheduled to be \$1,773,723. The principal subsidies are guaranteed and therefore a \$570,452 intergovernmental receivable and corresponding revenue have been reported in Sewer Enterprise Fund. Since the Town is legally obligated for the total amount of the debt, such amounts have been reported in the accompanying basic financial statements. Principal and interest subsidies totaled \$78,091 and \$67,918, respectively in 2016.

Bonds Payable Schedule – Water Enterprise Fund

Total.....	\$ 176,812,292	\$ 10,990,847	\$ (9,386,243)	\$ 15,663,665	\$ (8,327,661)	\$ 185,752,900	\$ 10,602,838

Compensated absence and other postemployment liabilities related to both governmental and business-type activities are normally paid from the funds reporting payroll and related expenditures, which consist of the general fund and the sewer, water, and solid waste enterprise funds, respectively.

NOTE 8 – GOVERNMENTAL FUND BALANCE CLASSIFICATIONS

The Town adopted GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, as part of its year 2011 reporting. The intention of the GASB is to provide a more structured classification of fund balance and to improve the usefulness of fund balance reporting to the users of the Town's financial statements. The reporting standard establishes a hierarchy for fund balance classifications and the constraints imposed on the uses of those resources.

Massachusetts General Law Ch. 40 §5B allows for the establishment of Stabilization funds for one or more different purposes. The creation of a fund requires a two-thirds vote of the legislative body and must clearly define the purpose of the fund. Any change to the purpose of the fund along with any additions to or appropriation from the fund requires a two-thirds vote of the legislative body.

At year end the balance of the General Stabilization Fund is \$2,286,624 and is reported as unassigned fund balance within the General Fund.

GASB 54 provides for two major types of fund balances, which are nonspendable and spendable. Nonspendable fund balances are balances that cannot be spent because they are not expected to be converted to cash or they are legally or contractually required to remain intact. Examples of this classification are prepaid items, inventories, and principal (corpus) of an endowment fund. The Town has reported principal portions of endowment funds as nonspendable.

In addition to the nonspendable fund balance, GASB 54 has provided a hierarchy of spendable fund balances, based on a hierarchy of spending constraints.

- Restricted: fund balances that are constrained by external parties, constitutional provisions, or enabling legislation.
- Committed: fund balances that contain self-imposed constraints of the government for its highest level of decision making authority.
- Assigned: fund balances that contain self-imposed constraints of the government to be used for a particular purpose.
- Unassigned: fund balance of the general fund that is not constrained for any particular purpose.

As of June 30, 2016, the governmental fund balances consisted of the following:

	Governmental Funds				
	General	Community Preservation Fund	High School Capital Projects	Nonmajor Governmental Funds	Total Governmental Funds
Fund Balances					
Nonspendable:					
Permanent fund principal..... \$	- \$	- \$	- \$	1,258,385 \$	1,258,385
Restricted for:					
Community preservation fund.....	-	3,280,990	-	-	3,280,990
School state and federal grants.....	-	-	-	327,681	327,681
Town state and federal grants.....	-	-	-	1,322,997	1,322,997
Town general revolving.....	-	-	-	1,179,544	1,179,544
School general revolving.....	-	-	-	590,185	590,185
Other.....	-	-	-	984,513	984,513
Permanent funds.....	-	-	-	1,379,889	1,379,889
Debt exclusion.....	1,972,217	-	-	-	1,972,217
Committed to:					
Postemployment benefits.....	-	-	-	180,177	180,177
Assigned for carryover encumbrances:					
General government.....	25,166	-	-	-	25,166

Education.....	23,779	-	-	-	23,779
Public works.....	2,804	-	-	-	2,804
Human services.....	5,000	-	-	-	5,000
Utilities.....	13,757	-	-	-	13,757
Unassigned.....	4,407,290	-	(1,724,185)	(651,016)	2,032,089
Total Fund Balances..... \$	<u>6,450,834</u>	<u>\$ 3,280,990</u>	<u>\$ (1,724,185)</u>	<u>\$ 6,572,355</u>	<u>\$ 14,579,994</u>

NOTE 9 – RISK FINANCING

The Town is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the Town carries commercial insurance. The amount of claim settlements has not exceeded insurance coverage in any of the previous three years.

The Town joined the Plymouth County Health Plan effective July 1, 1998. This health plan subsequently changed from a county administered plan to a joint purchase agreement (the “JPA”) and became known as the Mayflower Municipal Health Group. The purpose of the JPA is for the joint negotiation and purchase of health coverage with insurance carriers. Under these agreements, the insurance claims of the covered employees are paid for by the

insurance carrier and are subsequently reimbursed by the JPA. The JPA charges monthly premiums to each governmental unit based upon requirements established through underwriting and actuarial estimates. In addition, the JPA provides full reinsurance coverage for all claim costs in excess of \$250,000 per covered employee.

In the event of the dissolution of the JPA or if the assets of the JPA are insufficient to pay claims which occur, the Town remains liable for its proportionate share. At June 30, 2016 (based on the most recent audited information available), the Mayflower Municipal Health Group had an IBNR accrual of \$8.3 million and an ending net position of approximately \$13.5 million which appears sufficient to support its ongoing claim liabilities.

NOTE 10 – PENSION PLAN

Plan Descriptions

The Town is a member of the Plymouth County Contributory Retirement System (PCCRS), a cost-sharing multiple-employer defined benefit pension plan covering eligible employees of the 59 member units. The PCCRS is administered by five board members (Board) on behalf of all current employees and retirees except for current teachers and retired teachers. Chapter 32 of the MGL assigns authority to establish and amend benefit provisions of the plan. The audited financial report may be obtained by visiting <http://www.pcr-ma.org>.

The Town is a member of the Massachusetts Teachers' Retirement System (MTRS), a cost-sharing multi-employer defined benefit plan. MTRS is managed by the Commonwealth of Massachusetts (Commonwealth) on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a nonemployer contributor and is responsible for 100% of the contributions and future benefit requirements of the MTRS. The MTRS covers certified teachers in cities (except Boston), towns, regional school districts, charter schools, educational collaboratives and Quincy College. The MTRS is part of the Commonwealth's reporting entity and the audited financial report may be obtained by visiting <http://www.mass.gov/osc/publications-and-reports/financial-reports/>.

Special Funding Situation

The Commonwealth is a nonemployer contributor and is required by statute to make 100% of all actuarially determined employer contributions on behalf of the Town to the MTRS. Therefore, the Town is considered to be in a special funding situation as defined by GASB Statement No. 68, *Accounting and Financial Reporting for Pensions* and the Commonwealth is a nonemployer contributor in MTRS. Since the Town does not contribute directly to MTRS, there is no net pension liability to recognize. The total of the Commonwealth provided contributions have been allocated based on each employer's covered payroll to the total covered payroll of employers in MTRS as of the measurement date of June 30, 2015. The Town's portion of the collective pension expense, contributed by the Commonwealth, of \$7,825,532 is reported in the general fund as intergovernmental revenue and pension expense in the current year. The portion of the Commonwealth's collective net pension liability associated with the Town is \$96,481,795 as of the measurement date.

Benefits Provided

Both Systems provide retirement, disability, survivor and death benefits to plan members and beneficiaries. Massachusetts Contributory Retirement System benefits are, with certain minor exceptions, uniform from system to system. The System provides for retirement allowance benefits up to a maximum of 80% of a member's highest three-year average annual rate of regular compensation. For persons who became members on or after April 2, 2012, average salary is the average annual rate of regular compensation received during the five consecutive years that produce the highest average, or, if greater, during the last five years (whether or not consecutive) preceding retirement. Benefit payments are based upon a member's age, length of creditable

service, level of compensation, and group classification. Members become vested after ten years of creditable service.

Employees who resign from service and who are not eligible to receive a retirement allowance or are under the age of 55 are entitled to request a refund of their accumulated total deductions. Survivor benefits are extended to eligible beneficiaries of members whose death occurs prior to or following retirement.

Cost-of-living adjustments granted between 1981 and 1997 and any increase in other benefits imposed by the Commonwealth's state law during those years are borne by the Commonwealth and are deposited into the pension fund. Cost-of-living adjustments granted after 1997 must be approved by the Board and are borne by the System.

Contributions

Chapter 32 of the MGL governs the contributions of plan members and member units. Active plan members are required to contribute to the System at rates ranging from 5% to 9% of gross regular compensation with an additional 2% contribution required for compensation exceeding \$30,000. The percentage rate is keyed to the date upon which an employee's membership commences. The member units are required to pay into the PCCRS a legislatively mandated actuarial determined contribution that is apportioned among the employers based on active current payroll. The Town's proportionate share of the required contribution equaled its actual contribution for the year ended December 31, 2015 and totaled \$5,134,471, 23.74% of covered payroll, actuarially determined as an amount that, when combined with plan member contributions, is expected to finance the costs of benefits earned by plan members during the year, with an additional amount to finance any unfunded accrued liability.

Pension Liabilities

At June 30, 2016, the Town reported a liability of \$50,159,092 for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2015. The Town's proportion of the net pension liability was based on a projection of the Town's long-term share of contributions to the pension plan relative to the projected contributions of all participating members, actuarially determined. At December 31, 2015, the Town's proportion was 7.909%, which did not change from its proportion measured at December 31, 2014.

Pension Expense

For the year ended June 30, 2016, the Town recognized pension expense of \$5,559,956. At June 30, 2016, the Town reported deferred outflows of resources related to pensions of \$5,906,886, from the net difference between projected and actual investment earnings on pension plan investments. The Town reported deferred inflows of resources related to pensions of \$141,971, from the changes in proportion and the differences between employer contributions and their proportionate share of contributions.

The balances of deferred outflows and inflows at June 30, 2016 consist of the following:

Deferred category	Deferred Outflows of Resources	Deferred Inflows of Resources	Total
Differences between projected and actual earnings.....\$	5,906,886	\$ -	\$ 5,906,886
Changes in proportionate share of contributions.....	-	(141,971)	(141,971)
Total Deferred Outflows/(Inflows) of Resources.....\$	<u>5,906,886</u>	<u>(141,971)</u>	<u>\$ 5,764,915</u>

The deferred outflows of resources related to pensions will be recognized in pension expense as follows:

Year ended June 30:

2017.....	\$ 1,574,730
2018.....	1,574,730
2019.....	1,574,730
2020.....	<u>1,040,725</u>
Total.....	<u>\$ 5,764,915</u>

Actuarial Assumptions

The total pension liability in the January 1, 2015, actuarial valuation was determined using the following actuarial assumptions, rolled forward to the measurement date of December 31, 2015:

Valuation date.....	January 1, 2015
Actuarial cost method.....	Individual Entry Age Normal Cost Method.
Amortization method.....	Level percent, open group.
Remaining amortization period.....	17 years.
Asset valuation method.....	Actuarially valued using a five-year smoothing method of gains and losses.
Investment rate of return/Discount rate....	8.00%
Inflation rate.....	3.75%
Projected salary increases.....	3.75% per year.

Cost of living adjustments.....	3.0% of the lesser of the pension amount and \$13,000 per year.
Rates of retirement.....	Varies based upon age for general employees, police and fire employees.
Rates of disability.....	For general employees, it was assumed that 45% of all disabilities are ordinary (55% are service connected). For police and fire employees, 10% of all disabilities are assumed to be ordinary (90% are service connected).
Mortality rates.....	Pre-retirement and post retirement mortality are represented by the RP-2000 Mortality Table for males and females adjusted to 2015 with Scale AA. Disabled members is represented by the RP-2000 Mortality Table set forward two years for all disabled members.
Family composition.....	Assumption that 80% of members will be survived by a spouse, females are three years younger than males and males are three years older than females.

Investment policy

The pension plan's policy in regard to the allocation of invested assets is established and may be amended by the Board and pursuant to Massachusetts General Laws and Public Employee Retirement Administration guidelines. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the pension plan.

The investment objective is to fully fund the Plan by generating sufficient long-term inflation adjusted capital appreciation while providing sufficient liquidity to meet short-term withdrawal requirements. The Board desires to balance the goal of higher long-term returns with the goal of minimizing contribution volatility, recognizing these are often competing goals. This requires taking both assets and liabilities into account when setting investment strategy.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of January 1, 2015 are summarized in the following table:

Asset Class	Portfolio Target Weight	Long-Term Expected Real Rate of Return
Domestic equity.....	33.00%	10.20%
Foreign equity.....	16.00%	11.00%
Total fixed income.....	25.50%	7.90%
Real estate/real assets.....	13.00%	9.30%
Private equity.....	7.50%	14.60%
Hedge funds of funds.....	4.00%	8.70%
Cash.....	1.00%	4.00%
	100.00%	

Rate of return

For the year ended December 31, 2015, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 0.25%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Discount rate

The discount rate used to measure the total pension liability was 8.00%. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that contributions will be made at rates equal to the actuarially determined contribution rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the net pension liability to changes in the discount rate

The following presents the net pension liability, calculated using the discount rate of 8.00%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (7.00%) or 1-percentage-point higher (9.00%) than the current rate:

	1% Decrease (7.00%)	Current Discount (8.00%)	1% Increase (9.00%)
The Town's proportionate share of the net pension liability.....	\$ 62,231,427	\$ 50,159,092	\$ 39,806,247

NOTE 11 – POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS

Plan Description –The Town maintains a single employer defined benefit healthcare plan (the Retiree Health Plan). The Plan provides lifetime healthcare and life insurance for eligible retirees and their spouses. Chapter 32B of the MGL assigns authority to establish and amend benefit provisions of the Plan. The Plan provides the benefits by participating in the Mayflower Municipal Health Group. Medical and prescription drug benefits are provided to all eligible retirees through a variety of plans offered by Blue Cross Blue Shield of Massachusetts and Harvard Pilgrim Health Care. Benefit provisions are negotiated between the Town and the unions representing Town employees and are renegotiated each bargaining period. The other postemployment benefit plan does not issue a publicly available financial report.

At June 30, 2015, the Plan's membership consisted of the following:

Current retirees, beneficiaries, and dependents.....	702
Current active members.....	<u>569</u>
Total.....	<u><u>1,271</u></u>

Funding Policy – Contribution requirements are also negotiated between the Town and union representatives. Retired plan members and beneficiaries currently receiving benefits are required to contribute 50% of the cost of benefits provided depending on the plan they choose. For the year ended June 30, 2016, the Town is required to contribute the balance of the current premiums and may contribute additional amounts to pre-fund benefits. The Town contributed approximately \$2,551,447 during year 2016 towards these benefits. Administrative costs of the Plan are assumed to be included in the fully insured premium rates.

Annual OPEB Costs and Net OPEB Obligation – The Town's annual other postemployment benefit (OPEB) cost (expense) is calculated based on the *annual required contribution of the employer (ARC)*, an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years.

The components of the Town's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the Town's net OPEB obligations are summarized in the following table:

Annual required contribution.....	\$ 4,666,886
Interest on net OPEB obligation.....	1,089,772
Adjustments to annual required contribution.....	(1,635,673)
Amortization of actuarial (gains)/losses.....	<u>1,673,358</u>
Annual OPEB cost/expense.....	5,794,343
Contributions made.....	<u>(2,551,447)</u>
Increase/(Decrease) in net OPEB obligation.....	3,242,896
Net OPEB obligation - beginning of year.....	<u>31,136,281</u>
Net OPEB obligation - end of year.....	<u>\$ 34,379,177</u>

The Town's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for year 2016 and the two preceding years is as follows:

Year Ended	Annual OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
6/30/2016	\$ 5,794,343	44%	\$ 34,379,177
6/30/2015	6,188,555	35%	31,136,281
6/30/2014	5,878,599	36%	27,136,222

Funded Status and Funding Progress — the funded status of the Plan as of the most recent actuarial valuation date and the two prior valuations is as follows:

Actuarial Valuation Date	Actuarial Value of Assets (A)	Actuarial Accrued Liability (AAL) Projected Unit Credit (B)	Unfunded AAL (UAAL) (B-A)	Funded Ratio (A/B)	Covered Payroll (C)	UAAL as a Percentage of Covered Payroll ((B-A)/C)
7/1/2015	\$ 156,342	\$ 80,421,318	\$ 80,264,976	0.19%	\$ 55,261,176	145.25%
7/1/2012	-	72,909,973	72,909,973	0.00%	53,243,257	136.94%
6/30/2011	-	82,246,204	82,246,204	0.00%	51,297,584	160.33%

Actual valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the basic financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Methods and Assumptions – Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effect of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The following additional information is provided as of the latest actuarial valuation:

Actuarial cost method.....	Individual Entry Age Normal
Amortization method.....	Payments increasing at 3.75%, level % of payroll
Remaining amortization period.....	23 years at July 1, 2015, closed
Asset valuation method.....	Market value

Assumptions:

Investment rate of return.....	3.5%, pay-as-you-go scenario (previously 4%)
Inflation rate.....	2.75%
Annual compensation increases.....	3.0%
Medical/drug cost trend rate.....	6.0% decreasing by 1% for 1 year to an ultimate of 5% per year.

NOTE 12 – LANDFILL CLOSURE

State and federal laws and regulations require the Town to construct a final capping system on its landfill site when it stops accepting waste and to perform certain maintenance and monitoring functions at the site after closure. The Town closed and capped its landfill in 1995. The Town has reflected a \$384,750 post-closure care liability at June 30, 2016 as an obligation of the solid waste enterprise fund. This amount is based upon estimates of what it would cost to perform all post-closure care. Actual costs may be higher due to inflation, deflation, changes in technology, or changes in regulations. Its cost was estimated based on semi-annual sampling for the

current monitoring network at the site and estimated costs to maintain the integrity of the landfill cap during the post-closure period.

NOTE 13 – COMMITMENTS

The Town has various commitments related to the construction projects which will be financed through long-term borrowing. These projects include \$2.3 million for Liberty Plaza renovations, \$1.9 for construction on the water main construction and upgrades, and \$3.4 million for various construction projects throughout the Town. In addition, the Furnace Brook Middle School requires roof repairs that are estimated to cost approximately \$8.0 million. The Town is seeking reimbursement for the project through the Massachusetts School Building Authority's Accelerated Repair Program. This project is expected to begin during the summer of 2017.

NOTE 14 – CONTINGENCIES

The Town participates in a number of federal award programs. Although the grant programs have been audited in accordance with the provisions of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* through June 30, 2016, these programs are still subject to financial and compliance audits. The amount, if any, of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although it is expected such amounts, if any, to be immaterial.

Various legal actions and claims are pending. Litigation is subject to many uncertainties, and the outcome of individual litigated matters is not always predictable. Although the amount of liability, if any, at June 30, 2016, cannot be ascertained, management believes any resulting liability should not materially affect the financial position at June 30, 2016.

NOTE 15 – SUBSEQUENT EVENTS

Management has evaluated subsequent events through February 27, 2017, which is the date the financial statements were available to be issued.

NOTE 16 – IMPLEMENTATION OF NEW GASB PRONOUNCEMENTS

During 2016, the following GASB pronouncements were implemented:

- GASB Statement #72, *Fair Value Measurement and Application*. Notes to the basic financial statements were changed to provide additional disclosure on fair value measurement.
- GASB Statement #73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*. This pronouncement did not impact the basic financial statements.
- GASB Statement #76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*. This pronouncement did not impact the basic financial statements.
- GASB Statement #79, *Certain External Investment Pools and Pool Participants*. The basic financial statements and related notes were updated to be in compliance with this pronouncement.

The following GASB pronouncements will be implemented in future years:

- The GASB issued Statement #74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, which is required to be implemented in 2017.
- The GASB issued Statement #75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, which is required to be implemented in 2018.
- The GASB issued Statement #77, *Tax Abatement Disclosures*, which is required to be implemented in 2017.
- The GASB issued Statement #78, *Pensions Provided through Certain Multiple-Employer Defined Benefit Pension Plans*, which is required to be implemented in 2017.
- The GASB issued Statement #80, *Blending Requirements for Certain Component Units – an amendment of GASB Statement #14*, which is required to be implemented in 2017.
- The GASB issued Statement #81, *Irrevocable Split-Interest Agreements*, which is required to be implemented in 2018.
- The GASB issued Statement #82, *Pension Issues – an amendment of GASB Statement #67, #68, and #73*, which is required to be implemented in 2018.
- The GASB issued Statement #83, *Certain Asset Retirement Obligations*, which is required to be implemented in 2019.

Management is currently assessing the impact the implementation of these pronouncements will have on the basic financial statements.

Required Supplementary Information

General Fund Budgetary Comparison Schedule

The General Fund is the general operating fund of the Town. It is used to account for the entire Town's financial resources, except those required to be accounted for in another fund.

GENERAL FUND
SCHEDULE OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCE -
BUDGET AND ACTUAL

YEAR ENDED JUNE 30, 2016

	Budgeted Amounts				
	Original Budget	Final Budget	Actual Budgetary Amounts	Amounts Carried Forward To Next Year	Variance to Final Budget

Pension Plan Schedules

The Schedule of the Town's Proportionate Share of the Net Pension Liability presents multi-year trend information on the Town's net pension liability and related schedules.

The Schedule of Town's Contributions presents multi-year trend information on the Town's required and actual contributions to the pension plan and related ratios.

The Schedule of the Special Funding Amounts of the Net Pension Liability for the Massachusetts Teachers Retirement System presents multi-year trend information on the liability and expense assumed by the Commonwealth of Massachusetts on behalf of the Town along with related ratios.

These schedules are intended to present information for ten years. Until a ten-year trend is complied, information is presented for those years for which information is available.

**SCHEDULE OF THE TOWN'S PROPORTIONATE SHARE
OF THE NET PENSION LIABILITY
PLYMOUTH COUNTY CONTRIBUTORY RETIREMENT SYSTEM**

	December 31, 2014	December 31, 2015
Town's proportion of the net pension liability (asset).....	7.909%	7.909%
Town's proportionate share of the net pension liability (asset)..... \$	46,100,484	\$ 50,159,092

Contributions as a percentage of covered- employee payroll.....	23.26%	23.74%

Note: this schedule is intended to present information for 10 years.
Until a 10-year trend is compiled, information is presented for those
years for which information is available.

See notes to required supplementary information.

**SCHEDULE OF THE SPECIAL FUNDING AMOUNTS
OF THE NET PENSION LIABILITY
MASSACHUSETTS TEACHERS' RETIREMENT SYSTEM**

The Commonwealth of Massachusetts is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of the member employers which creates a special funding situation. Since the Town does not contribute directly to MTRS, there is no net pension liability to recognize. This schedule discloses the Commonwealth's 100% share of the collective net pension liability that is associated with the Town; the portion of the collective pension expense as both a revenue and pension expense recognized by the Town; and the Plan's fiduciary net position as a percentage of the total liability.

<u>Fiscal Year</u>	<u>Commonwealth's 100% Share of the Net Pension Liability Associated with the Town</u>	<u>Town's Expense and Revenue Recognized for the Commonwealth's Support</u>	<u>Plan Fiduciary Net Position as a Percentage of the Total Liability</u>
2016.....	\$ 96,481,795	\$ 7,825,532	55.38%
2015.....	74,722,138	5,191,306	61.64%

Note: this schedule is intended to present information for 10 years.
Until a 10-year trend is compiled, information is presented for those years for which information is available.

See notes to required supplementary information.

Other Postemployment Benefit Plan Schedules

The Schedule of Funding Progress compares, over time, the actuarial accrued liability for benefits with the actuarial value of accumulated plan assets.

The Schedule of Employer Contributions compares, over time, the annual required contributions to the actual contribution made.

The Schedule of Actuarial Methods and Assumptions presents factors that significantly affect the identification of trends in the amounts reported.

OTHER POSTEMPLOYMENT BENEFIT PLAN

OTHER POSTEMPLOYMENT BENEFIT PLAN
ACTUARIAL METHODS AND ASSUMPTIONS

Actuarial Methods:

Valuation date.....	July 1, 2015
Actuarial cost method.....	Individual Entry Age Normal
Amortization method.....	Payments increasing at 3.75%, level % of payroll
Remaining amortization period.....	23 years at July 1, 2015, closed
Asset valuation method.....	Market value

Actuarial Assumptions:

Investment rate of return.....	3.5%, pay-as-you-go scenario (previously 4%)
Inflation rate.....	2.75%
Annual compensation increases.....	3.0%
Medical/drug cost trend rate.....	6.0% decreasing by 1% for 1 year to an ultimate of 5% per year.

Plan Membership:

Current retirees, beneficiaries, and dependents.....	702
Current active members.....	<u>569</u>
Total.....	<u><u>1,271</u></u>

See notes to required supplementary information.

NOTE A - STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY**A. Budgetary Information**

Municipal Law requires the adoption of a balanced budget that is approved by the Finance Committee (Committee). The Committee presents an annual budget to the Open Town Meeting, which includes estimates of revenues and other financing sources and recommendations of expenditures and other financing uses. The Town, which has full authority to amend and/or reject the budget or any line item, adopts the expenditure budget by majority vote.

Increases or transfers between and within departments subsequent to the approval of the annual budget, requires majority vote at a Special Town Meeting.

The majority of appropriations are non-continuing which lapse at the end of each year. Others are continuing appropriations for which the governing body has authorized that an unspent balance from a prior year be carried forward and made available for spending in the current year. These carry forwards are included as part of the subsequent year's original budget.

Generally, expenditures may not exceed the legal level of spending (salaries and expenses) authorized for an appropriation account. However, the payment of debt service is statutorily required, regardless of whether such amounts are appropriated. Additionally, expenditures for disasters, natural or otherwise, and final claims and judgments may exceed the level of spending authorized by majority vote at a Special Town Meeting.

An annual budget is adopted for the general fund in conformity with the guidelines described above. The original year 2016 approved budget authorized approximately \$85.3 million in appropriations and other amounts to be raised.

The Town Accountant's office has the responsibility to ensure that budgetary control is maintained. Budgetary control is exercised through the accounting system.

B. Budgetary - GAAP Reconciliation

For budgetary financial reporting purposes, the Uniform Municipal Accounting System basis of accounting (established by the Commonwealth) is followed, which differs from the GAAP basis of accounting. A reconciliation of budgetary-basis to GAAP-basis results for the general fund for the year ended June 30, 2016, is presented below:

Net change in fund balance, budgetary basis.....	\$ (3,286,137)
<u>Perspective difference:</u>	
Activity of the stabilization fund recorded in the general fund for GAAP.....	6,678
<u>Basis of accounting differences:</u>	
Net change in recording revenue accruals.....	163,474
Net change in recording tax refunds payable.....	71,130
Net change in expenditure accruals.....	41,304
Recognition of revenue for on-behalf payments.....	7,825,532
Recognition of expenditures for on-behalf payments.....	<u>(7,825,532)</u>
Net change in fund balance - GAAP basis.....	\$ <u><u>(3,003,551)</u></u>

NOTE B – PENSION PLAN***Pension Plan Schedules***A. Schedule of the Town's Proportionate Share of the Net Pension Liability

The Schedule of the Town's Proportionate Share of the Net Pension Liability details the allocated percentage of the net pension liability (asset), the proportionate share of the net pension liability, and the covered employee payroll. It also demonstrates the net position as a percentage of the pension liability and the net pension liability as a percentage of covered payroll.

B. Schedule of Town's Contributions

Governmental employers are required to pay an annual appropriation as established by PERAC. The appropriation includes the amounts to pay the pension portion of each member's retirement allowance, an amount to amortize the actuarially determined unfunded liability to zero in accordance with the System's funding schedule, and additional appropriations in accordance with adopted early retirement incentive programs. The appropriations are payable on July 1 and January 1. The Town may choose to pay the entire appropriation in July at a discounted rate. Accordingly, actual contributions may be less than the "total appropriation". The pension fund appropriation is allocated to the Town based on covered payroll.

C. Schedule of the Special Funding Amounts of the Net Pension Liabilities

The Commonwealth of Massachusetts is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of the member employers which creates a special funding situation. Since the Town does not contribute directly to MTRS, there is no net pension liability to recognize. This schedule discloses the Commonwealth's 100% share of the collective net pension liability that is associated with the Town; the portion of the collective pension expense as both revenue and pension expense recognized by the Town; and the Plan's fiduciary net position as a percentage of the total liability.

D. Changes in Assumptions

None.

E. Changes in Plan Provisions

None.

NOTE C – OTHER POSTEMPLOYMENT BENEFITS

The Town administers a single-employer defined benefit healthcare plan (“the Retiree Health Plan”). The plan provides lifetime healthcare for eligible retirees and their spouses through the Town’s health insurance plan, which covers both active and retired members, including teachers.

The Town primarily finances its other postemployment benefits (OPEB) on a pay-as-you-go basis. As a result, the funded ratio (actual value of assets expressed as a percentage of the actuarial accrued liability) is .19%. In accordance with Governmental Accounting Standards, the Town has recorded its OPEB cost equal to the actuarial determined annual required contribution (ARC) which includes the normal cost of providing benefits for the year and a component for the amortization of the total unfunded actuarial accrued liability of the plan.

The Schedule of Funding Progress presents multi-year trend information which compares, over time, the actuarial accrued liability for benefits with the actuarial value of accumulated plan assets.

The Schedule of Employer Contributions presents multi-year trend information for required and actual contributions relating to the plan.

Projections of benefits for financial reporting purposes are based on the substantive plan and included the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit cost between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The Schedule of Actuarial Methods and Assumptions presents factors that significantly affect the identification of trends in the amounts reported.

Combining and Individual Fund Statements

Nonmajor Governmental Funds

Special Revenue Funds

Special revenue funds are used to account for the proceeds of specific revenue sources (other than permanent funds or capital project funds) that are restricted by law or administrative action to expenditures for specified purposes. The Town's special revenue funds are grouped into the following categories:

School State and Federal Grant Fund – This fund accounts for all federal and state grants used for school related projects and activities.

Town State and Federal Grant Fund – This fund is used to account for all federal and state grants used for Town related projects and activities.

Airport Fund – This fund is used to account for improvements, certain maintenance, and capital equipment associated with the Town's Municipal Airport.

Town General Revolving Fund – This fund accounts for various Town operations such as insurance recoveries, recreation activities and workers compensation.

School General Revolving Fund – This fund accounts for school activities, such as operation of the public school lunch program, athletic receipts and tuition costs.

Chapter 90 Fund - This fund accounts for grants received from the State mainly in relation to maintaining the Town's streets and sidewalks.

Postemployment Benefits – This fund is used to account for amounts accumulated for future Town obligations related to postemployment benefits.

Other Funds - These funds account for receipts reserved for appropriation as well as various bequests made by benefactors to the Town for which principal portions of bequests as well as the related earnings can be expended by the Town.

Capital Projects

Capital project funds are used to account for financial resources used in the acquisition or construction of major capital facilities (other than those financed by enterprise funds).

Town Capital Project Fund – This fund is used to account for and report financial resources for the acquisition or construction of non-school capital facilities and other capital assets of the governmental funds.

Permanent Funds

Permanent funds are used to report resources that are legally restricted to the extent that only earnings, not principal, may be used for purposes that support governmental programs.

Permanent Funds – These funds account for all contributions and bequests for which only earnings may be expended to benefit the government.

Statistical Section

Pictured above is the Ocean Bluff.

Statistical Section

This part of the Town of Marshfield's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Town's overall financial health.

Financial Trends

- These schedules contain trend information to help the reader understand how the Town's financial performance and well-being have changed over time.

Revenue Capacity

- These schedules contain information to help the reader assess the Town's most significant local revenue source, the property tax.

Debt Capacity

- These schedules present information to help the reader assess the affordability of the Town's current levels of outstanding debt and the Town's ability to issue additional debt in the future.

Demographic and Economic Information

- These schedules offer demographic and economic indicators to help the reader understand the environment within which the Town's financial activities take place.

Operating Information

- These schedules contain service and infrastructure data to help the reader understand how the information in the Town's financial report relates to the services the Town provides and the activities it performs.

SOURCES: Unless otherwise noted, the information in these schedules is derived from the Town's financial reports for the relevant year.

n/a - Information is not available.

(1) Educational expenditures and intergovernmental revenue decreased by approximately \$5.5 million in 2015 relating to a change in the way the Commonwealth of Massachusetts reported on-behalf payments for teacher's retirement benefits. For the year 2007 the Town's Sewer Enterprise Fund was reported as a Special Revenue Fund and was included as part of the Governmental Funds.

(1) Revaluation year.

Source: Assessor's Department, Town of Marshfield and Official Statements.

All property in the Commonwealth of Massachusetts is assessed at 100% of fair cash value.

Note: Chapter 59, Section 21C of the Massachusetts General Laws, known as "Proposition 2 1/2", imposes 2 separate limits on the annual tax levy of the Town. The primary limitation is that the tax levy cannot exceed 2 1/2 percent of the full and fair cash value. The secondary limitation is that the tax levy cannot exceed the maximum levy limit for the preceding year as determined by the State Commissioner of Revenue by more than 2 1/2 percent, subject to an exception for property added to the tax rolls and for certain substantial valuation increases other than as part of a general revaluation. The secondary limit may be exceeded in any year by a majority vote of the voters, however it cannot exceed the primary limitation.

Direct and Overlapping Governmental Activities Debt

As of June 30, 2016

<u>Town of Marshfield, Massachusetts</u>	<u>Debt Outstanding</u>	<u>Estimated Percentage Applicable (1)</u>	<u>Estimated Share of Overlapping Debt</u>
Debt repaid with property taxes:			
Plymouth County.....	\$ 2,200,000	6.48%	\$ 142,560
Town direct debt.....	<u>79,007,659</u>		<u>-</u>
Total direct and overlapping debt.....	\$ <u>81,207,659</u>		\$ <u>142,560</u>

Note: Overlapping governments are those that coincide, at least in part, with geographic boundaries of the Town. This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the taxpayers of the Town. This process recognizes that, when considering the government's ability to issue and repay long-term debt, the entire debt burden borne by the property taxpayers should be taken into account. However, this does not imply that every taxpayer is a resident, and therefore responsible for repaying the debt, of each overlapping government.

Source: Plymouth County Treasurer

- (1) County expenses, including debt service, are assessed upon the Towns within the County in proportion to their taxable valuation.
