License # \_\_\_\_\_ Expiration Date \_\_\_\_\_

All licenses are issued for one year beginning June 1st

Make check payable to the Town of Marshfield and return your application with check to the Board of Health

A license cannot be issued unless the information requested is complete

**Excerpt from Marshfield Rules and Regulations on Sewage Disposal**

The Board of Health reserves the right to request a soil evaluation as part of any Title 5 Inspection to assist in determining the seasonal high ground water determination.

**Upgrading of substandard onsite sewage disposal systems**

Septic systems consisting of one cesspool shall be upgraded to conform to 310 CMR 15.00, the State Environmental Code, Title V, Minimum Requirements for the subsurface disposal of Sanitary Sewage and the Town of Marshfield requirements.

Cesspools with an overflow system or leaching pit(s) may continue but will require further evaluation by the Board of Health as specified by the following procedure. A cesspool with a leaching pit/system will require that a soil evaluation be conducted by a licensed soil evaluator to determine the seasonal high water determination. Systems with any part of the soil absorption area below the seasonal high groundwater shall constitute a failure. This regulation shall apply to any septic system inspection conducted in accordance with 310 CMR 15.301 of the State Environmental Code, Title V. This regulation shall also be strictly enforced during the building permit application process.

"I testify that I have completed all of the above information accurately and have read the excerpt from the Marshfield Rules and Regulations."
