

Massachusetts Department of Public Health Arbovirus Surveillance Program Report

Key Public Risk Communication Messages for This Week:

MDPH has reported the third human case of WNV from Hampden County. MDPH reports 108 WNV positive mosquito samples from Barnstable, Berkshire, Bristol, Essex, Hampden, Hampshire, Middlesex, Norfolk, Plymouth, Suffolk, and Worcester Counties. In response to increasing WNV activity, communities within Hampshire, Norfolk and Worcester Counties were raised to Moderate WNV risk. Five EEE mosquito samples have been detected in Worcester County. Intensified surveillance in the region is ongoing. Check your risk levels throughout the season by visiting our interactive site <https://www.mass.gov/info-details/massachusetts-arbovirus-update>

Intense precipitation events and average daytime temperatures will continue to support populations of mosquito vectors. Avoid mosquito bites by using EPA approved repellents, appropriate clothing and avoiding peak mosquito activity between dusk and dawn. Remove standing water by emptying containers and tarps.

Please review the 2023 MDPH Surveillance and Response Plan for updates to risk levels and risk messaging. <https://www.mass.gov/doc/2023-arbovirus-surveillance-and-response-plan/download>

WNV and EEE Virus Surveillance Summary	
Results contained in this report reflect data up to and inclusive of MMWR Week 36 (Sunday, 09/03/2023-Saturday, 09/09/2023)	
Mosquito Surveillance	
Number of Mosquito Samples Tested	8599
Number of WNV Positive Samples	108
Number of EEE Positive Samples	5
Equine/Mammal Surveillance	
Number of Mammal Specimens Tested	0
Number of WNV Positive Horses	0
Number of EEE Positive Horses	0
Number of other WNV Positive Mammals	0
Human Surveillance	
Number of Human Specimens Tested	149
Number of Human WNV Cases	3
Number of Human EEE Cases	0
